PROJECTS

Microsoft D365 e-commerce Solution Developed on Microsoft Dynamics 365 Commerce, our e-commerce platform boasts a robust foundation built on the React-based Fabrikam theme. Beyond customization, I'm actively involved in crafting additional features to optimize functionality, ensuring our product aligns seamlessly with the company's objectives.

Video Analytics Collaborating closely with AI/ML and backend teams, I contributed to the development of our company's flagship product on Angular. This platform employs sophisticated algorithms to detect incidents such as person falls, fires, and other events. Leveraging various graphs, we enabled comprehensive analytics capabilities to enhance user insights and decision-making.

Visitor Management System As my inaugural solo project as a front-end developer, I spearheaded the development of this web application using Angular 14. The system comprises distinct modules including visitor, staff, user management, and authentication. To enhance functionality, I integrated a library enabling live photo capture of visitors.
